BASICS

Power On and Power Off

Change Mode

Solid | Chill | Music

Scroll Colour Pallet

- Ravelights will remember Mode and Settings that you set
- We will improve on, and add more modes in planned RavelightOS updates.

NICE THINGS

X2

Check Battery Level

More Green = More Battery

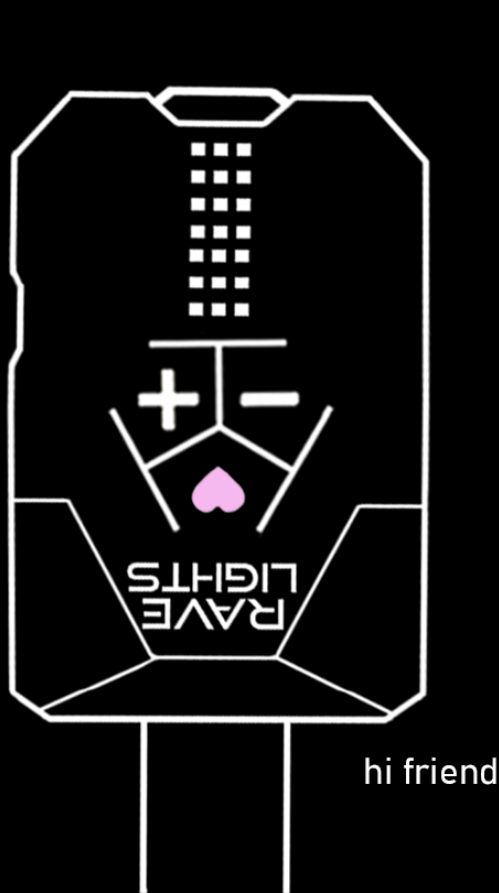

Change Brightness Level

● Fun Fact

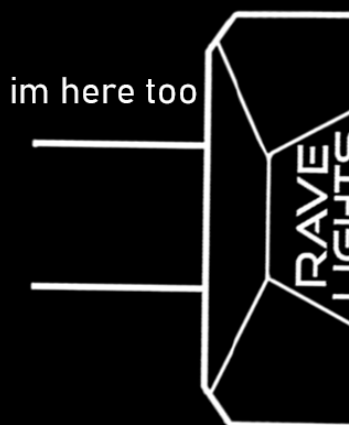

We have an idea on how to increase Ravelight battery life & runtime. If we are successful, we will release a free RavelightOS update for everyone.

PARTY UP SYNC

- Sync with your friends
- Control lighting in an entire space
- Coordinate Outfits
- Pair with future Ravelight products
- Make things look soooo cool

Pair all your Ravelights
Together

PARTY UP SYNC

PART 1

Enter Pairing Mode

On 2 Ravelights:

➡ 1.  Hold   together for 2 seconds.

Ravelight will begin pulsing purple. It is searching for friends.

➡ 2. Repeat Step 1 on the other Ravelight

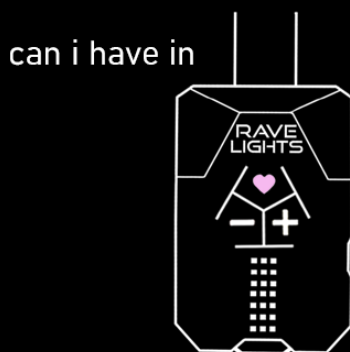

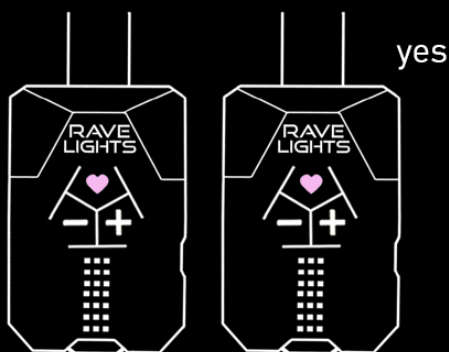

When Ravelights find each other, they will resume normal operation. They are now paired! It can take up to 30 seconds.

PARTY UP SYNC

PART 2

When you pair 2 Ravelights, you create a pairing group.
You can now add more Ravelights to the group.

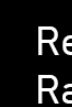

Add more Ravelights to Pairing Group

On a Ravelight that is already in a group:

1.  Hold **- +** together for 2 seconds.
Ravelight will begin pulsing purple.

2.  Then Press **+**

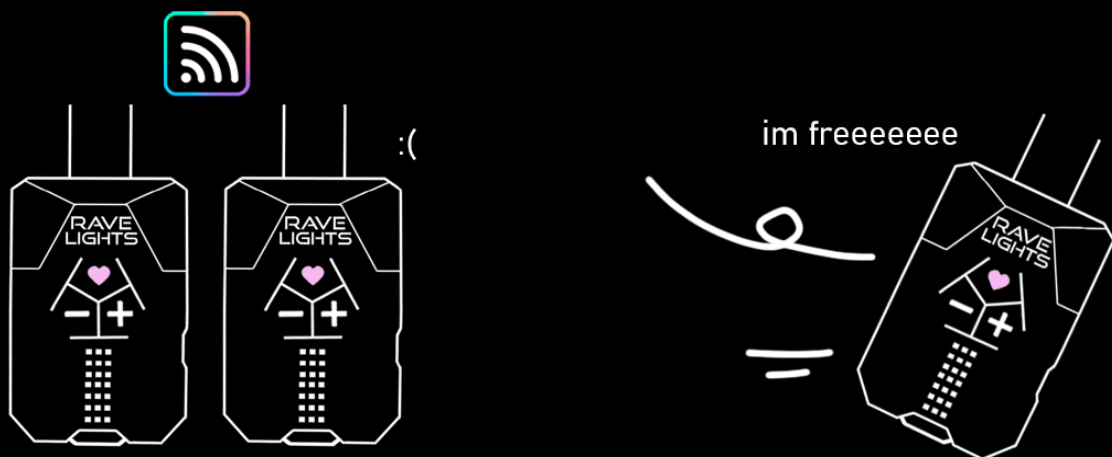

3.  Repeat only Step 1 on unpaired Ravelight. The new Ravelight will join the group.

When Ravelights find each other, they will resume normal operation. They are now paired! It can take up to 30 seconds.

PARTY UP SYNC

Unpair a Ravelight

1.  Hold **- +** together for 2 seconds.
Ravelight will begin pulsing purple.

2.  Press **-**

 Ravelight will resume normal operation and is now unpaired

! If you are having issues pairing, unpair and restart Ravelights, then try again

● We got soooo excited when we got Party Up Sync working for the first time during development. It was really hard!

UPDATE RAVELIGHT OS

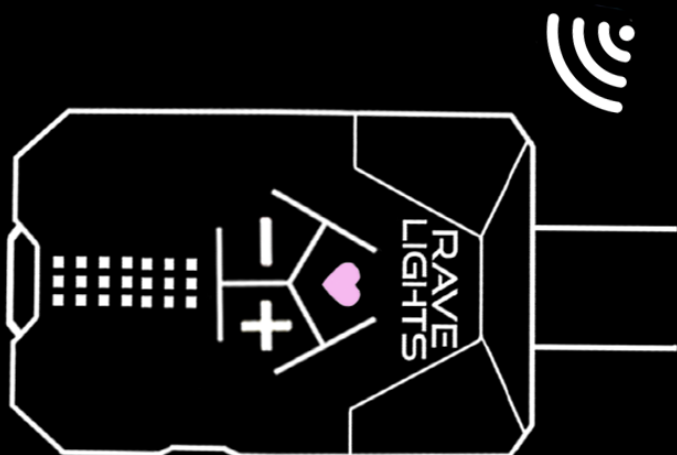

Ravelights get free over the air updates with new features and improvements.

We will notify you by email when an update is ready for your Ravelights, with instructions.

Ravelights update in a Bluetooth supported browser like Chrome. You don't need to download anything!

(Available Soon!) Go to updates.ravelights.ca

Follow the instructions based on your device. Your Ravelights will connect in browser, and update.

- When we start to roll out updates, we will start a beta testing group. We want your feedback, and your ideas on what we should add to Ravelights next. Follow our socials for more. Details TBA.

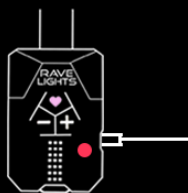

CHARGING MOUNTING KIT & DURABILITY TIPS

Charging

Charge Ravelights with a type A to C cable, like the one included. Not all C to C cables work.

CHARGING = Case Glows RED

CHARGED = Case Glows BLUE

As with all battery powered devices, don't charge Ravelights unattended!

Mounting Kit

Don't use Mounting Kit on walls with Wallpaper!

Mounting Kit uses 3M Poster Command Strips. You can order more on Amazon. They are cheap.

Durability Tips

The nylon LED rope is strong! The box is strong, but not strong as the LED. If you swing Ravelights, hold from the LED and NOT the box. Don't put tension on the LED/box connection.

The Ravelights case may yellow from exposure to UV sources, such as the sun. Damn physics.

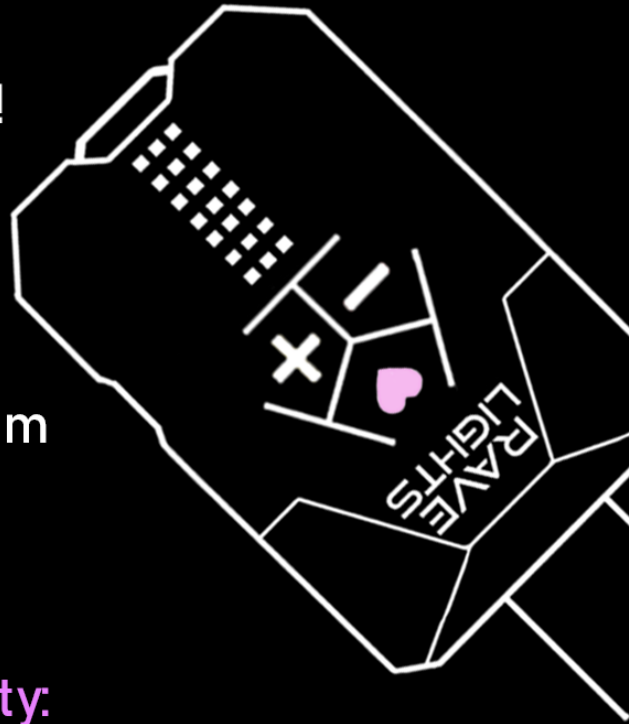

THE LAST PAGE

Thanks for being part of this project! Pls share pics!

We hope you enjoy!

Love,

The Ravelights Team
